

**BPA + BPS**

**FREE**

**THERMAL PAPER**

No Bisphenols used

Phenol Free receipt paper refers to thermal paper used for printing receipts that do not contain Phenol-based chemicals, particularly bisphenol-A (BPA) and bisphenol-S (BPS). These chemicals are commonly used in thermal paper coatings to create the color-changing effect when heat is applied, allowing for receipt printing without the need for ink or ribbons.

## KEY FEATURES

- Manufactured without BPA, BPS or other phenol based thermal developers.
- Designed to perform as effectively as traditional phenol-base thermal papers, ensuring seamless and unnoticeable integration into existing POS systems and applications.
- The transition to Phenol Free thermal paper will not compromise the end-user experience.
- Phenol-Free product is generally considered safer for health and its environmental impact.
- All of TST IMPRESO's phenol free thermal paper is FSC mill certified.
- Recyclable using same traditional office recycling programs.
- Advancement in technology provides the same level of print quality, durability and color-changing capabilities.

## PRODUCTS

Phenol Free receipt paper is now available from TST IMPRESO in the most popular sizes, to accommodate the market demand and needs.

SKU#	Size	Core	Rolls / Ctn
